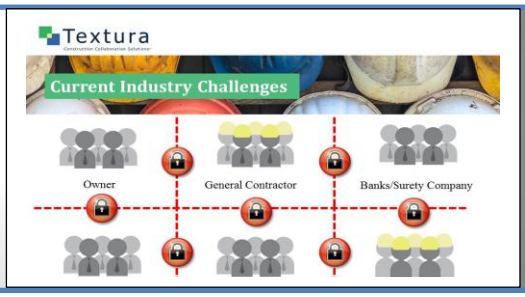
Current Industry Challenges

Identify specific challenges involved in a typical draw process including invoicing, compliance management, lien waiver exchange and payment.



Textura®—Construction Payment Management™

See exactly how Textura's Construction Payment Management Solution takes this process online and helps reduce up to 80% of the process steps involved in the invoice and payment process.

ERP Integration

In addition to the efficiency savings that our cloud-based payment solution can provide, a further reduction can be achieved upon integration with your ERP or accounting software programs. This integration assists with reducing manual data entry that often accompanies this process.
