ONLINE EXAM PREPARATION

LEED AP BD+C

For LEED GA's & LEED AP's

Four individual sessions will be held on **February 2, 8, 15, 22, 2012**. Each session is 2 hours in length. Note, all classes are held on Thursday night.

8-10 pm EST

February 2: Review of the LEED BD&C Rating System; Sustainable Sites

February 8: Water Efficiency; Energy & Atmosphere

February 15: Materials & Resources; Indoor Environmental Quality

February 22: Innovation in Design / Regional Priority; LEED Exam Tips

This course will be delivered via Virtual Classroom e-Learning. You will receive the same content as you would in the classroom, with a live instructor, in real time, via the internet. A high speed internet connection and speakers or a headset are required.

Cost of the course is \$250

The fee also includes the following:

*Access to 4x100 Practice Questions (unlimited use for 60 days)

*Access to LEED experts for follow up questions via online Forum

*Recorded class sessions for 60 days after final course

*Live LEED Expert Instructors

*LEED BD+C Study Matrix

WHAT IS THE LEED AP BD+C?

The LEED AP BD+C professional credential replaces the LEED AP for New Construction exam track. This specialty credential provides a standard for professionals participating in the design and construction phases of high-performance, healthful, durable, affordable, and environmentally sound commercial, institutional, and high-rise residential buildings. The AP BD+C is now designated a Tier 2 Accreditation.

ABOUT THIS ONLINE COURSE

Our Virtual Classroom e-Learning delivers the same content as the classroom, with a live instructor, in real time, via the Internet. It's completely interactive - ask questions and get answers from the instructor. This 4-session live class series provides an in-depth approach to the LEED Version 3 Rating System specific to Green Building Design and Construction and is designed to assist individuals in their preparation for GBCI's LEED AP credentialing exam. The program focuses on the essential concepts, technical requirements, design standards, case studies/lessons learned and the tools necessary for sustainable construction to comply with the LEED Green Building Rating System and to pass the LEED AP+ BD&C Exam that is administered by GBCI.

WHO SHOULD ATTEND AND WHY?

The LEED AP BD+C Specialty Exam is for those professionals that implement on LEED projects. You have to pass the LEED Green Associate exam first (or in conjunction with). Additionally, in order to take this LEED specialty exam, you need to have worked on a LEED registered or certified project*. If you have access to the LEED v3 BD&C Reference Guide, that will help while following along with this course.

ABOUT THE INSTRUCTORS

The mission at Sustainable Investment Group is to assist both individuals and organizations in their career/project goals related to the green building industry. All of SIG's instructors are LEED AP's and have worked on LEED projects from inception to completion. They understand what it takes to prepare for the LEED exams and know effective ways to pass. SIG also provides expertise and environmentally focused solutions to design, construction, real estate, and building operations professionals that are seeking eco-responsible approaches to building and development through consulting, education, and training.

Jason Kiefer, LEED AP BD+C, ID+C, O+M, Homes [Principal at SIG]: Kiefer has extensive construction and development experience in both the commercial and residential sectors. His portfolio includes a spectrum of LEED certified projects that include LEED NC, LEED CS, LEED CI, LEED EB, and LEED for Homes. Jason has also successfully completed projects in the commercial building industry ranging from healthcare, office, industrial, mixed-use, TI's, and retrofits.

Charlie Cichetti, LEED AP BD+C, ID+C, O+M, Homes [Principal at SIG]: Cichetti oversees the LEED Consulting & Technical Services while running SIG's Atlanta Office. He was one of the first professionals to hold multiple LEED AP w/ specialty credentials. Charlie is a sought after Consultant, Trainer, and Master Speaker across the U.S. that continues to aid Green Building movement.
