Meeting Program: SWPPP/STORMWATER/EPA Update: What Does This Mean To Me Today And Tomorrow On The Jobsite

The underlying theme of this program is "what do I need to do differently today at my jobsite than what I have been doing?" This session will address that question to enable you to determine what recent federal and state changes really mean to your way of operating. The emphasis will be on the effect of regulations and changes at the municipal level. The discussion will include new areas of concern in audits and regulations; best practices for implementation; and a look at what might be in the pipeline for future changes.
