

## SAVE THE DATE

### **AGC OF AMERICA – AMERICAN SOCIETY OF PROFESSIONAL ESTIMATORS ESTIMATING ACADEMY COMING TO OMAHA**

OCTOBER 27-28, 2008

This nationally recognized two-day program will be held October 27 and 28 in Omaha at the downtown Embassy Suites. This workshop will be limited to 50 participants and is a sell out academy.

The registration fee will be \$425.00

This two and a half day course will cover current topics like LEED® - Estimating for Green Buildings, Estimating with Electronic Documents, Managing Preconstruction, and Conceptual Estimating. This Estimating Academy will also offer sessions on estimating for specialties, such as concrete and mechanical. Led by industry experts participants will discover and discuss the most compelling components of Construction Estimating and learn how to apply them to their next project.

#### Learning Objectives:

- Review use of electronic documents from either CD's or the Internet
- Compare electronic documents, digitizers, and manual scaling methods
- Establish the benefits of using electronic documents
- Discuss LEED® standards
- Compare the bidding and estimating procedures of green vs. traditional construction
- Identify the LEED® Rating System and its impact on design, project planning and construction strategies
- Review and discuss multiple approaches and delivery systems for developing conceptual estimates
- Analyze the components of a conceptual estimate including site, foundation, structure, building envelope, interior walls, core and tenant finishes, specialty items, equipment and conveying systems.
- Examine the skills, process and tools necessary for the estimator to take the lead during preconstruction
- Discuss concept planning, schematic design, design development, and establishment of the GMP
- Identify team relationships, conflict resolution, budget management, and other keys to success

Registration information will be out this Summer.
