

**The Weekly Safety Meetings for June are attached to this e-mail message.**

**The topics for June are:**

- National Safety Month**
- Prepare for Bad Weather**
- Gimme a Break!**
- Is Your Personal Vehicle Safe?**

Dear Jean,

**Do you remember your first summer job? Here are some resources to help you keep young summer workers safe.**

In the summer, do you add young people to your crew? Young adults can be great additions to the workforce. They are often enthusiastic and eager to learn. But they are also inexperienced and need training and supervision in order to work well and stay safe. Did you know that:

- More than 75% of teens have worked by the time they finish high school.
- Many teens use part-time and seasonal work to learn or improve work skills.
- On average, three teens die every week due to a workplace injury.
- Teens are likely to be inexperienced and unfamiliar with many of the tasks they are assigned to work on.
- Employers are responsible for making the workplace safe for all employees—including teens.
- Child labor laws prohibit teens from doing dangerous work.

There are many resources you can use to get the information you need about hiring young workers. Here are a few:

- OSHA's main resource for young workers has information for young people, their parents, and employers. Access it [here](#).
- OSHA has partnered with #MySafeSummerJob to help young workers learn about their rights and responsibilities regarding safety. Click [here](#) for more information.
- The Department of Labor has an informative page listing the conditions under which young people can work. You can access it [here](#).
- For state-specific laws (and more) regarding young people in the workplace, click [here](#).

Don't assume that new workers will ask you questions; you have to start the conversation about safety. Ask all new employees questions to assess their knowledge and skills. All new employees will have to do some learning on the job. Young workers in particular, will learn a lot by trial and error, but the error part can result in permanent injuries. You have to know what they are doing and how they are learning. You cannot let those kinds of errors happen. Proper training is an investment in their future, your peace of mind, and the long-term safety of the company.

#### **A Special Note from Nebraska Building Chapter AGC**

Together with our members we promote skill, responsibility and integrity through construction and services that enhance the quality of life for those who live, work, or travel in Nebraska and beyond. Call the chapter office at 402-438-0400 or visit [www.agcnebuilders.com](http://www.agcnebuilders.com) for information and resources for members.

As always, **SAFETY MEETING OUTLINES, INC.** welcomes your questions, comments, and ideas. We are happy to help you access additional safety meetings in our Library or advise you on how to conduct a safety meeting. Feel free to contact us by phone at 815-464-0200 (Monday through Friday, 8:00 am to 5:00 pm Central Time) or send an e-mail to [orders@safetymeetingoutlines.com](mailto:orders@safetymeetingoutlines.com).
