Developing your Workforce in 2025

Construction Supervision Fundamentals (CSF)

OCONSTRUCTION CSF is designed by AGC of America, specifically to meet the needs of the SUPERVISION learner as well as the construction industry. Developed and field tested by contractors and for use in training new supervisor, or newly promoted foremen, or anyone who seeks career advancement.

The **CSF course** is a highly interactive first step on the path to developing construction supervisors. This course presents nine foundation skills of successful supervisors:

- Team Management
- Project and Team Leadership
- · Communication Skills
- Time Management and Project Scheduling
- · Risk Management

- · Construction Law and Contract Documents
- Problem Resolution
- · Productivity and Cost Control
- Skills Development

There are 15 hours in-seat classroom instruction and approximately 4 hours of assignments between sessions.

Who should take this course: Newly promoted employees to supervisory roles, or those seeking career advancement.

August 8, 15, and 22, 2025—You MUST attend all sessions DATES:

TIME: 7:30am - 12:30pm
